DETAILED ACTION

I) Objection to claims 7,9,12 will not be maintained in light of amendment filed 12/16/03.

Applicant amended claims to depend from claim 1.

II. Rejection of claims 7,13 under 35 USC 112 will not be maintained in light of amendment filed 12/16/03. Applicant amended claim 7 to depend from claim 1. Applicant amended claim 13 to read as a method claim.

Applicant's arguments filed 12/16/03 have been fully considered but they are not persuasive. See arguments below.

III. Rejection of claims 1-5,7-12 under 35 USC 103(a) will be maintained in light of amendment filed 12/16/03. New claims 14 and 15 are added to this rejection. Applicant argues that the combining of the two references does not produce the instant invention to a composition comprising oxathiazine and a quaternary ammonium or oxathiazine and a triazole in synergistic proportions. Applicant directs Examiner attention to synergistic results in instant specification on page 1 line 28 – page 2 line 10. Examiner argues that references are combined for individually teaching compositions that are applied to wood in order to protect the wood from wood destroying materials (fungi). In addition, Examiner argues that Applicant's invention is obvious because Applicant claims synergism for a broad class of combinations (oxathiazines plus triazoles or oxathiazines plus quaternary ammonium compounds), but does not provide unexpected data for the broad combination of compounds. Applicant directs Examiner to page 1 line 28 – page 2 line 10 to support claim to synergism. However, Examiner only sees a mere statement that the combinations are synergistic. There are no unexpected data provided at this citation in Applicant's specification. Applicant also directs Examiner to page 22 Table 1 to study

synergism. Examiner argues that Applicant data are to specifically named compound combinations rather than to a number of synergistic combinations to cover the instant broad claims of compound combination (oxathiazines plus triazoles or oxathiazines plus quaternary ammonium compounds).

IV. Applicant argues, while Davis discloses an oxathiazole compound with several triazole compounds, Davis fails to recognize the amounts of each compound to cause synergism. Applicant directs Examiner's attention to Table 1 on page 22 to point out that the effective protection of wood is not achieved when Bardap 26, tebuconazole and propiconazole is used by themselves. The data is not clear to the Examiner. Please explain.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
